## INTRODUCTION

Information Engineering Services Pty Ltd (IES) provides world-wide skills-transfer education and consulting services. These services provide training and consulting support in business and IT methods for Business Integration, largely based on the use of Enterprise Architecture. Training and consulting support is also provided in the latest technologies for Technology Integration, to achieve rapid delivery of priority databases, business processes and systems into production.

---

## EDUCATION SERVICES

Our Public Courses are regularly presented in many cities throughout the world. Most can also be presented as Inhouse Courses that are tailored to your specific needs and conducted on-site, or off-site as required.

- Click here for an Overview of these courses  
Or from any page use the **Courses** button above or at left.
- Click here for Just-In-Time Project Team Training  
Or from any page use the **Projects** button above or at left.

## CONSULTING SERVICES

We provide Consulting Services in the various methods and technologies for rapid project delivery that are presented in the Education Services above. These include Quality Assurance consulting services associated with Just-In-Time Project Team Training above, as well as Project Management and Technology Consulting Services.
